

# The TEAM UP for Children Transformation Model

## The Learning Community

**Clinical Training**  
in core competencies of  
pediatric integrated care,  
with role-focused support  
for new & existing care  
team roles

## Implementation & Sustainability Support

delivered through a  
data-driven quality  
improvement framework  
with technical assistance

## Strengthen Primary Care Foundations

- Engage leadership in transformational change & empower organizational champions
- Ensure the organizational structure supports transformation & reflects integration
  - Involve families & the community in the transformation

## Ready the Physical and Operational Environment

- Optimize revenue & prepare for sustainability
  - Fortify EMR & reporting systems
- Prepare the physical space for the integrated care team
- Foster a trauma-forward, culturally-responsive environment

## Build the Care Team

- Augment staffing & establish new roles for behavioral health clinicians & community health workers
  - Develop clinical skills & knowledge in core areas of pediatric behavioral health
  - Reinforce a collaborative, team-based approach to care

## Transform Clinical Care

- Include screening for social, developmental & behavioral issues, parental concerns & Social Determinants of Health

## Provide Access to Integrated Behavioral Health Care

- Address material needs & identify emerging behavioral issues
- Build population health strategies & care management workflows
  - Engage families in comprehensive, evidence-based treatment
  - Bridge connections to specialty services

## Strengthen Families of Young Children

- Augment support during the prenatal-postpartum transition
- Promote strength-based parenting & encourage access to early childhood education
  - Navigate families through Early Intervention services
- Develop and deliver a brief therapeutic intervention designed for the integrated setting (BRANCH)
